You are to evaluate the European countries listed below regarding their solutions and governmental policies pertaining to each of the environmental issues.

Then, if a country has made substantial gains or has effective policies in place, put a check in the small inset box. If a country has significant environmental problems and/or has not developed appropriate policies regarding these issues, place a minus in the small inset box.

List examples to support your decision, such as a particular policies that enacted to reduce air pollution, carbon footprints, etc. in a given country. The last row has been left blank so you can add an additional country of your choice.
